**Animal and Meat Production in Ghana-An Overview**
Original Article, C1
Adzitey F.

J. World's Poult. Res. 3(1):

ABSTRACT:
Animal production is an integral part of Ghana's agricultural economy and a major source of livelihood for many rural people. Accurate data is therefore needed to inform policy making, planning, and to assess the impact of programs on the sector. It is possible that the data collected by the FAO and other stakeholders will use this data in planning and making of policies, and to monitor changes that may occur overtime.

Key words: Agricultural economy, Animal production, Animal species, Meat production, Ghana.

J. World's Poult. Res. 3(1):

ABSTRACT:
The present study was undertaken to compare different diagnostic procedures for the detection of Newcastle disease and infectious Bursal disease in chickens. The authors evaluated the performance of Conventional and molecular methods, and concluded that reliable, sensitive, specific and more accurate methods to detect the viruses for the confirmatory diagnosis of diseases.

Rural poultry farming with improved breed of backyard chicken
ABSTRACT: Livestock and poultry rearing is an imperative factor for improving the nutritional security of rural poor in India. Rural farmers rear Desi type chicken with low egg and meat production in backyard system. For developing the rural poultry farming, improved technology is required. These Desi type chickens are reared in the backyard of the rural farmer's home. The local farmer also breeds these chickens as a source of food security to the needy villagers paving a way for sustainable agriculture in rural areas of India.

A study on Cestode Parasites of Corvus Species of Kashmir, India

Original Article, C6
Ahmad Dar J., Tanveer S., Ahmad Kuchai J. and Ahmad Dar Sh.
J. World's Poult. Res. 3(1): 28-34
Volume 3: Issue 1, March 2013

**ABSTRACT:** During the present study, three species of the genus *Corvus* namely *Corvus monedula*, *C. splendens* and *C. macrorhynchos* were collected from different localities of Kashmir valley and investigated for the presence of cestode parasites. *Anomotaenia galbulae* (Gmelin, 1790) Furhrmann, 1932 was recovered from all the three host species. While, *Choanotaenia micracantha* was recovered only from *C. monedula* and no specimen of this cestode was obtained from *C. Splendens* and *C. macrorhynchos* during the present study. The specimens thus collected were identified as *Anomotaenia galbulae* and *Choanotaenia micracantha* on the basis of various morphological and morphometric characters when compared to the known species of genera *Anomotaenia* and *Choanotaenia* respectively. However, some intraspecific variations were observed.

**Effect of Dietary Inclusion** *Zataria multiflora* **on Histological Parameters of Bursa of Fabricius in Broilers**

Original Article, C7

Shomali T, Hamedi S, Paryani MR, Mohseni SM, Farzaneh M.

*J. World's Poult. Res.* 3(1):

**ABSTRACT:** Regarding the remarkable role of bursa of Fabricius as a primary lymphoid organ in poultry, this study aimed to evaluate the effect of long term administration of *Zataria multiflora* as an herbal immunomodulatory agent on histological features of this organ in broiler chickens. To this end, fifty, one-day old chickens were randomly divided into five equal groups and fed with diets contained 0.5, 1, 1.5, and 2% of *Z. multiflora* (experimental groups) or basal diet (control group) for 45 days. On day 46, birds were slaughtered and bursa of Fabricius was removed and examined using a linear graticule. Number of follicles in plicae was also counted under light microscope. The results showed a dose dependent increase in all histomorphometric parameters due to *Z. multiflora* administration and the highest increase was in the thickness of follicular cortex of birds treated with 2% *Z. multiflora*.

In conclusion, dietary inclusion of *Z. multiflora* during the rearing period of broilers, dose dependently affects histological structures of bursa of Fabricius in a way that may enhance its role as a lymphoid organ.

**Key words:** Bursa of Fabricius; Histology;
